General terms for plot reservation application

The order of preference for searching plots is not binding on the City of Lappeenranta, but we will try to follow it whenever possible. If you include more than one plot to be searched, you are more likely to be successful.

The information in the application is public in terms of the plot being sought. The tender prices become public when the tenders are opened. The personal details in the application will be kept secret to the extent prescribed in the Personal Data Act.

A group of applicants planning to build a terraced house or semi-detached must submit each household's work, housing and child details in a separate attachment. This information must include at least what is indicated as mandatory fields in the application.

If you have lived in your current home for less than two years, you must add another attachment to give the same details for the previous home as for the current one.

Please make sure you have filled in all necessary information as any incomplete application may be disregarded.

If you are planning to build a house and then to sell it, please use a paper form if possible.

If you provide false information, your application will be rejected or decision to receive a plot to be cancelled.

The City will charge a fee of EUR 100 each time you want to change your mind about the plot you want; this fee will cover application processing and document creation.
